The Regional Officer
Jharkhand State Pollution Control Board
Near PTC Chowk, Matwari Road,
Hazaribag.

WBD/EMC/4016/ 128 /16
September 21, 2016

Sub.: **Environmental Statement for the year of 2015 - 2016**

Dear Sir,

Kindly find enclosed herewith 'Environmental Statement' in duplicate for the year of 2015 – 2016 for our following unit:

- WASHERY-III

Thanking you,

Yours sincerely,

Sahabji Kuchroo
Chief (KBP & Project)

Encl.: As above.

c.c.: The Member Secretary
Jharkhand State Pollution Control Board
TA Building, Dhurwa
Ranchi.

Form-V
(See Rule 14)
Environmental statement for the financial year ending 31st March 2016

(Unit- Washery-III)

PART-A

i)	Name and address of the owner/ Occupier of the industry operation or process	:	**Mr. Kajal Hota** **Head (W-III)** **West Bokaro Division,** **TATA Steel Limited, P.O.: Ghatotand** **Dist. Ramgarh, Jharkhand- 825314**
ii)	Industry category Primary- (STC-code) Secondary- (SIC code)	:	SITC -321.4, 321.5A, 321.6A ISIC -2100
iii)	Production capacity- units	:	15,000 TPD (4.5 MTPA) Raw Coal throughputs
iv)	Year of establishment	:	1994
v)	Date of last environmental statement submitted		Letter no. WBD/EMC/4016/492/15, dated 26th Sept, 2015. For the year 2014-15.

PART-B
Water and Raw material Consumption

i) Water Consumption (m^3/d)

Process	:	2084.00 m^3/d
Cooling	:	Not applicable
Domestic	:	(This is included in the Environmental Statement of West Bokaro Colliery)

Name of the Product	Process Water Consumption per unit of product output	
	During the previous Financial year (2014-15)	During the current Financial year (2015-16)
Clean Coal	0.34 KL/T	0.51 KL/T

ii) Raw material consumption

*Name of raw materials	Name of products	Consumption of raw material per unit of output	
		During the previous Financial year (2014-15)	During the current Financial year (2015-16)
Raw Coal	Clean coal	2.02 t/t of clean coal (Yield – 49.46%)	1.87 t/t of clean coal (Yield – 53.48%)
Magnetite	Middling	0.67 kg/t of coarse coal	0.70 kg/t of coarse coal
Synthetic collector		0.51 kg/t of fine raw coal	0.48 kg/t of fine raw coal
Frother		0.11 kg/t of fine raw coal	0.10 kg/t of fine raw coal
Flocculent		0.020 kg/t of raw coal	0.021 kg/t of raw coal

*Industry may use codes is disclosing details of raw material would violate contractual obligation otherwise all industries have to name the raw materials used.

PART-C

Pollution discharged to environment / unit of output
(Parameter as specified in the consent issued)

Pollutants	Quantity of pollutants discharged (mass /day)	Concentration of pollutants in discharges (mass / volume)	Percentage of variation from prescribed standards with reason
a) WATER	The plant is operated at zero discharge. Entire process effluent is 100% recycled back in circuit. The quality of same is regularly being monitored and being maintained well below, as per regulatory norm as **annexure-II.**		
b) AIR	Due to absence of stationary source, it is difficult to measure pollutants load. However, ambient air quality is being measured in the area. Results of ambient air quality monitoring report are enclosed as **annexure-I**		

PART-D

(As specified under Hazardous Wastes
[Management, Handling and Transboundry Movement Rules, 2008])

Hazardous Waste	Total Quantity	
	During the previous financial year (2014-15)	During the current financial year (2015-16)
(a) From Process a) Oil soaked cotton (jute)	1230 Kg/y	550 Kg/y
(b) From Pollution control facilities a. Used oil	3540 liters	5800 liters

PART- E

Solid Wastes

	Solid Wastes	Total Quantity	
		During the previous financial year(2014-15)	During the current financial year (2015-16)
(a)	From Process Rejects (by products) Tailings	 238096 T 592178 T	 428918 T 293086 T
(b)	From Pollution control facilities	-	-
(C)	(1) Quantity recycled or reutilized within the unit Reject	Rejects are being used in FBC power plant, disposed off to outside agencies & stacked in specified locations. About 2.28 lakh ton used in captive power plant.	
	(2) Sold (to reuse as fuel) Rejects	3.03 lakh ton to institutionalized customer operating power plant, the said quantity includes reject of Washery -II also.	
	Tailings (3) Disposed	Brick Klin, and power plant operator. Total quantity is 7.30 lakh ton includes tailing of Washery- II.	

PART-F

Please specify the characterization (in term of composition and quantum) of hazardous as well as solid wastes and indicate disposal practice adopted for both these categories of wastes.

Category of Waste	Characteristics	Quantity	Disposal Practice
Solid Waste			
1. Rejects	Coal of -13mm size (*Solid*)	428918 T	Used in FBC power house and disposed off to outside parties operating power plant / stacked.
2. Tailings	Coal of -0.5mm size (*Solid*)	293086 T	Disposed off to outside agencies (Brick klin manufacturer, institutionalized customer).
Haz. Waste			
1. Used Oil	Used Oil (*Liquid*)	5800 lit	Disposed off to authorized recycler.
2. Oil soaked cotton/jute	Used Cotton(*Solid*)	550 Kg	Safely collected and disposed off.

PART-G

Impact of the pollution abatement measure taken on conservation of natural resources and on the cost of production

Adequate fixed type dust suppression arrangement is working inside Washery roads. Last year the same was extended up to 1.0 km covering an additional area of tailing de-watering. Dry fog system in coal handling plant and large vacuum cleaner is installed for recovery of spillage in the circuit. In addition to above modifier is regularly being used in froth-flotation process for additional clean coal recovery, which not only increases the yield of process but also conserves the natural resources.

The combined impact due to implementation of pollution prevention and control measures on cost per tonne of ROM coal, of entire west Bokaro division (Washery, PH, Mines, Eng. services, Logistic, etc.) is Rs. 31.45 (Rupees thirty-one and forty-five paisa only).

PART-H

Additional measures / investment proposal for environmental protection including abatement of pollution, prevention of pollution

Dry fog dust suppression system in both coal washeries are running well. By using strict monitoring of raw materials last year yield has been improved by using less raw material. Synthetic collector is being used in place of diesel to conserve natural resources. Fixed type of water sprinkling system in Washery area is operated regularly. An additional remaining area was covered.

PART-I

Any other particular for improving the quality of the environment

EMS ISO 14001 & OHSAS 18001 are being monitored and practiced strictly to protect and preserve the environment by eco-friendly operations and prevent any potential hazard to become risk posing serious threat to environment in a proactive manner Reduction in water consumption by ensuring its use in judicious manner, further, working on to reduction of power consumption by improving / replacing various energy efficient equipments. Mechanical Tailing dewatering plant is in operation to recover tailings and ensure recycling of water to wash plant. This has reduced the use of tailing ponds, a commitment towards continual improvement of environmental performance.
